

Limited Salesforce QA, Migration Validation, UAT, and Handoff Support

Prepared by Nakul as an independent freelancer/sole proprietor. This is a narrow subcontractor/support packet for Railroad Commission of Texas RFO 455-26-1018: requirements traceability, Salesforce QA, data-migration checks, UAT evidence, release documentation, accessibility checks, and training handoff. It is not a full prime response, Texas authorization claim, HUB/VetHUB ownership claim, insurance representation, or long-term managed-services contract.

Buyer	Railroad Commission of Texas
RFP	RFO 455-26-1018 STISS; responses due May 19, 2026 at 2:00 PM Central by email per RFO
Package	USD 22,500 fixed Salesforce QA/UAT, migration-validation, release-traceability, and handoff support slice
Inputs	Approved workorder requirements, non-confidential mappings, lower-environment access after approval, Jira/Copado workflow, and tracker format

RFO-Specific Fit

Public RFO materials describe Salesforce and tools support across requirements, architecture, configuration/development, data migration, integrations, testing, UAT, accessibility, training, documentation, and release support. Workorder 1 centers on replacing the Texas Damage Reporting Form process in Salesforce. This slice strengthens delivery evidence beside a qualified prime, without claiming prime capacity.

Deliverables

Area	Support deliverable
Traceability matrix	Requirements mapped to design, build, test, release, owner, status, evidence, and risk notes.
UAT script pack	Scripts for external submissions, authenticated users, internal incident/docket processing, payments, letters, dashboards, and role access.
Migration QA pack	Object/field mapping checks, data classification notes, reconciliation rules, duplicate handling, attachment checks, and exception log.
Release support	Jira/Copado defect-retest register, dependency/risk log, release-readiness notes, and production-support transition checklist.
Training handoff kit	Quick references, admin support notes, runbook gaps, known issues, and knowledge-transfer checklist.

Boundaries

This should move through a qualified prime, subcontract, or formally approved procurement path. It should not be sent as a casual procurement-content question because the written inquiry deadline has passed. No regulatory records, payment data, credentials, or confidential RRC files are requested by email. Texas business authorization, HUB/VetHUB HSP ownership, insurance representation, prime references, full delivery staffing, and long-term managed services are outside this fixed support package unless separately verified.

Fixed price: USD 22,500	Next step: use this as a selected-prime/subcontract support packet or formally approved response attachment, then confirm Texas authorization, HSP/insurance responsibilities, subcontract acceptance, and whether lower-environment/sample artifacts can be reviewed without confidential records.
