

Salesforce implementation QA and UAT support sidecar

Prepared by Nakul as an independent freelancer/sole proprietor for BakerRipley. I can support the implementation team with fixed-scope QA/UAT, release-readiness, and data-migration evidence without claiming to be a Salesforce prime. This is not a full prime-vendor proposal unless the buyer confirms that path; it is a bounded support slice.

Buyer	BakerRipley
Opportunity	RFP 26-06 Salesforce Professional Services
Package	USD 19,500 fixed - Salesforce implementation QA and UAT support sidecar
Path	Procedural eligibility note first; not a proposal submission unless BakerRipley confirms eligibility.

Fit

The main RFP is for Salesforce professional services; the useful lane here is implementation QA, migration sampling, and UAT evidence beside a qualified Salesforce team.

Area	Support deliverable
1	Requirements-to-acceptance matrix for the highest-risk workflow slice
2	Sample-data mapping checklist with duplicate, missing-value, and exception rules
3	Role-based UAT scripts with pass/fail evidence capture
4	Issue and retest register with severity, owner, and closure criteria
5	Reporting/export validation checklist for priority operational outputs
6	Executive handoff memo with open risks and recommended next actions

Boundary

No client, participant, or production CRM records should be sent by email; use dummy records or a secure BakerRipley-approved workspace.

Fixed price: USD 19,500	Could you confirm whether a vendor without documented attendance at the May 5 mandatory conference may still be considered for a narrow support-sidecar role?
