

SharePoint workflow QA and maintenance support slice

Prepared by Nakul as an independent freelancer/sole proprietor for Connecticut Auditors of Public Accounts. I can provide a fixed workflow-QA and maintenance-readiness slice either as a named specialist resource or beside the selected maintenance team. This is not a full prime-vendor proposal unless the buyer confirms that path; it is a bounded support slice.

Buyer	Connecticut Auditors of Public Accounts
Opportunity	2026-01 APA Microsoft SharePoint Maintenance RFP
Package	USD 12,500 fixed - SharePoint workflow QA and maintenance support slice
Path	Formal RFP question to inquiry contact; proposal path remains controlled by the RFP.

Fit

The RFP maps well to SharePoint workflow maintenance, permission review, template QA, and repeatable support evidence.

Area	Support deliverable
1	Requirements-to-acceptance matrix for the highest-risk workflow slice
2	Sample-data mapping checklist with duplicate, missing-value, and exception rules
3	Role-based UAT scripts with pass/fail evidence capture
4	Issue and retest register with severity, owner, and closure criteria
5	Reporting/export validation checklist for priority operational outputs
6	Executive handoff memo with open risks and recommended next actions

Boundary

No confidential audit files should be sent by email; the first pass can use site structure, redacted examples, or dummy records.

Fixed price: USD 12,500	May respondents include named subcontractors or specialist partner resources for SharePoint/Power Platform maintenance, and where should those roles and qualifications be described?
