

IAM role validation and rollout QA support

Prepared by Nakul as an independent freelancer/sole proprietor for Maine Community College System. I can provide a fixed IAM UAT and rollout-readiness package beside the primary identity vendor. This is not a full prime-vendor proposal unless the buyer confirms that path; it is a bounded support slice.

Buyer	Maine Community College System
Opportunity	Identity and Access Management Solution RFP
Package	USD 10,500 fixed - IAM role validation and rollout QA support
Path	Email-ready support packet for RFP Coordinator review if eligible.

Fit

IAM rollout risk often concentrates around role mapping, provisioning/deprovisioning tests, exception handling, and staff handoff.

Area	Support deliverable
1	Requirements-to-acceptance matrix for the highest-risk workflow slice
2	Sample-data mapping checklist with duplicate, missing-value, and exception rules
3	Role-based UAT scripts with pass/fail evidence capture
4	Issue and retest register with severity, owner, and closure criteria
5	Reporting/export validation checklist for priority operational outputs
6	Executive handoff memo with open risks and recommended next actions

Boundary

No passwords, tokens, student records, or production credentials should be sent by email; use test tenants, dummy users, or screen-share review.

Fixed price: USD 10,500	If a narrow support slice is eligible, I can route the packet through the RFP Coordinator path or to the selected implementation team.
