

Museum CRM data migration and acceptance QA support

Prepared by Nakul as an independent freelancer/sole proprietor for Friends of Springfield Art Museum. I can provide a fixed data migration/UAT support package that helps the CRM team launch with fewer data-quality surprises. This is not a full prime-vendor proposal unless the buyer confirms that path; it is a bounded support slice.

Buyer	Friends of Springfield Art Museum
Opportunity	CRM RFQ for Friends of Springfield Art Museum / Springfield Art Museum Foundation
Package	USD 7,500 fixed - Museum CRM data migration and acceptance QA support
Path	RFQ-specific support note, email preferred by the public posting.

Fit

The RFQ needs CRM judgment; data mapping, dedupe, import sampling, UAT scripts, and launch evidence are a practical fixed support lane.

Area	Support deliverable
1	Requirements-to-acceptance matrix for the highest-risk workflow slice
2	Sample-data mapping checklist with duplicate, missing-value, and exception rules
3	Role-based UAT scripts with pass/fail evidence capture
4	Issue and retest register with severity, owner, and closure criteria
5	Reporting/export validation checklist for priority operational outputs
6	Executive handoff memo with open risks and recommended next actions

Boundary

No donor PII, payment records, or private notes should be sent by email; start with field lists, dummy rows, or a secure approved export.

Fixed price: USD 7,500	Would a narrow CRM migration QA/support-sidecar be useful for this RFQ, or should I route this only to the selected CRM partner once chosen?
