

GIS/data workflow QA and deliverable support slice

Prepared by Nakul as an independent freelancer/sole proprietor for Town of Hillsborough. I can provide fixed data, GIS, and deliverable QA support beside the town's selected consultant or task-order team. This is not a full prime-vendor proposal unless the buyer confirms that path; it is a bounded support slice.

Buyer	Town of Hillsborough
Opportunity	As-needed consulting and engineering services RFP
Package	USD 6,500 fixed - GIS/data workflow QA and deliverable support slice
Path	Eligibility/selected-consultant support note; no licensed-service claim.

Fit

The support lane is data, GIS, issue tracking, public-facing deliverable QA, and handoff evidence beside licensed professionals.

Area	Support deliverable
1	Requirements-to-acceptance matrix for the highest-risk workflow slice
2	Sample-data mapping checklist with duplicate, missing-value, and exception rules
3	Role-based UAT scripts with pass/fail evidence capture
4	Issue and retest register with severity, owner, and closure criteria
5	Reporting/export validation checklist for priority operational outputs
6	Executive handoff memo with open risks and recommended next actions

Boundary

No licensed engineering, survey, planning certification, or sealed deliverable is included; this is data/workflow QA and documentation support.

Fixed price: USD 6,500	Could you confirm whether a narrow data/GIS workflow support note is useful for this RFP, or should it be routed through the selected consultant team?
