

BOUNDED SUPPORT OPTION

SoIN Tourism CMS, CRM, and Partner Portal Launch QA

Prepared as a focused support slice for SoIN Tourism's public Website Services RFP. This is not a request for an individual pre-submission meeting and is not a full prime website redesign proposal.

Counterparty	SoIN Tourism / Clark-Floyd Counties Convention-Tourism Bureau
RFP fit	Website services, CMS, CRM system of record, and Partner Portal/Extranet launch risk
Package	USD 8,500 fixed launch-QA support package
Inputs	Staging site, priority journeys, dummy/test records, and selected vendor timeline

RFP-Specific Risk Areas

- Partner Portal/Extranet flows where partners update listings, events, assets, and profile information while SoIN staff retain approval controls.
- CMS and CRM handoffs, including Simpleview transition assumptions and the new system-of-record workflow.
- AI readiness around structured content, metadata, schema, search visibility, and generative-search discoverability.
- High-use visitor, partner, staff-editor, form, mobile, redirect, analytics, and accessibility paths before launch.

Deliverables

Area	Support deliverable
Acceptance map	Turn the RFP, FAQ, staging site, and priority journeys into a practical launch checklist.
Partner portal QA	Test representative partner listing, event, asset, profile, approval, and staff-oversight flows.
Website QA	Smoke test forms, redirects, metadata, schema, analytics, mobile, browser, and high-use visitor paths.
Accessibility pass	Review representative templates and public journeys for practical WCAG-oriented issues.
Handoff	Prioritized punch-list tracker, retest pass, editor guardrails, and 30-day regression checklist.

Boundaries

- No visitor, partner, or CRM production data is needed by email.
- Use public/staging pages and dummy/test records where possible.
- This support slice can serve SoIN directly or the selected vendor after award.
- This does not replace the full RFP response, website build, CRM selection, hosting, or ongoing maintenance scope.

Next Step

If useful, reply with the expected staging or vendor-selection window. I will convert this support slice into a concise one-page scope with final acceptance criteria and payment terms.
