

# Digital library accessibility and launch acceptance test pack

Prepared by Nakul as an independent freelancer/sole proprietor for City of San Antonio Public Library - Digital Experience Redesign. This is a specialist launch-acceptance support pack beside the PaaS vendor or as a formal portal component if eligible. This is not the PaaS platform, library ILS contract, legal accessibility certification, hosting package, or long-term managed service.

|             |                                                                                                                                                   |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Buyer       | City of San Antonio Public Library - Digital Experience Redesign                                                                                  |
| Opportunity | San Antonio Public Library seeks a library-specific Platform as a Service solution for the Digital Library through RFCSP 26-029 / RFx 6100019598. |
| Package     | USD 9,500 fixed; portal/vendor support only - Digital library accessibility and launch acceptance test pack                                       |
| Path        | SAePS portal or approved selected-vendor/prime path                                                                                               |

## Fit

The official city posting lists a May 18, 2026 deadline and directs vendors to the SAePS portal.

| Area | Support deliverable                                                                                   |
|------|-------------------------------------------------------------------------------------------------------|
| 1    | Patron journey test matrix for discovery, account, holds, renewals, digital resources, and help paths |
| 2    | Keyboard, screen-reader, contrast, focus, and mobile checks for priority templates                    |
| 3    | Search/navigation acceptance tests with expected results and failure notes                            |
| 4    | Admin workflow UAT scripts for content updates, resource changes, and help escalation                 |
| 5    | Launch readiness report with blocker severity, retest status, and go/no-go summary                    |
| 6    | Staff handoff checklist for routine checks after launch                                               |

## Boundary

No patron records, library account data, staff credentials, or restricted analytics should be sent by email. Use public catalog examples or approved test accounts.

|                                             |                                                                                                          |
|---------------------------------------------|----------------------------------------------------------------------------------------------------------|
| USD 9,500 fixed; portal/vendor support only | Use through SAePS or with the selected/prime vendor after confirming communication and submission rules. |
|---------------------------------------------|----------------------------------------------------------------------------------------------------------|
