

GIS/ECM readiness and task-order starter pack

Prepared by Nakul as an independent freelancer/sole proprietor for WSSC Water - GIS and Engineering Records Document Management Support. This is a support appendix beside a qualified BOA prime or formal portal component only if eligibility is confirmed. This is not a BOA prime bid, licensed engineering service, engineering judgment, utility security assessment, or records-retention legal opinion.

Buyer	WSSC Water - GIS and Engineering Records Document Management Support
Opportunity	WSSC Water is procuring GIS and Engineering Records Document Management Support through an OpenGov opportunity.
Package	USD 3,500 fixed; BOA support slice only - GIS/ECM readiness and task-order starter pack
Path	WSSC OpenGov portal or approved prime/subcontract path

Fit

The public opportunity is active through May 29, 2026 and routes action through OpenGov.

Area	Support deliverable
1	Three likely task-order use cases with scope, data needs, acceptance evidence, and handoff notes
2	GIS/ECM data and workflow risk register for engineering records and project systems
3	Draft staffing/responsibility matrix for GIS, document management, and workflow support
4	Cloud/SQL migration and integration assumptions list for prime review
5	Ten-page technical support appendix outline for a formal BOA response
6	Open questions checklist for OpenGov or prime-team clarification

Boundary

No utility engineering records, maps with sensitive infrastructure, credentials, or nonpublic project files should be sent by email.

USD 3,500 fixed; BOA support slice only	Use through WSSC OpenGov or an approved prime/subcontract channel after confirming eligibility and communication rules.
