

Pension data and workflow fit-gap sprint

Prepared by Nakul as an independent freelancer/sole proprietor for City of St. Petersburg - Pension Management Software. This is an evaluation/support slice for the City project team or a pension SaaS implementation team, not a software-product bid. This is not actuarial advice, legal benefit advice, pension administration software, hosting, or a full implementation prime proposal.

Buyer	City of St. Petersburg - Pension Management Software
Opportunity	St. Petersburg is procuring pension management software with workflow, document management, data import/export, reporting, audit trail, and member portal needs.
Package	USD 2,800 fixed; support/evaluation slice only - Pension data and workflow fit-gap sprint
Path	St. Petersburg OpenGov portal or approved vendor/prime path

Fit

The public opportunity points to OpenGov submission with a May 26, 2026 deadline.

Area	Support deliverable
1	Functional fit-gap matrix for activity tracking, member portal, documents, reports, and audit trail
2	Migration risk log for import/export fields, history depth, attachments, and validation checks
3	Workflow QA checklist for approvals, notices, document handling, and exception states
4	Vendor demo script with must-show scenarios and pass/fail evidence fields
5	Sample implementation schedule with discovery, build, test, parallel run, and go-live checks
6	Open issues memo for procurement or implementation-team review

Boundary

No member records, pension calculations, bank data, beneficiary data, credentials, or personnel data should be sent by email.

USD 2,800 fixed; support/evaluation slice only	Use through the St. Petersburg OpenGov process or with an approved pension software vendor/prime.
