

Notion-Adalo Sync v1

Prepared by Nakul as an independent freelancer/sole proprietor for Emanuel Arias - Notion and Adalo integration. This is a fixed v1 integration proof using sample records and approved API access. This is not a promise of full two-way sync, offline support, app-store readiness, or privacy/legal compliance.

Buyer	Emanuel Arias - Notion and Adalo integration
Opportunity	Emanuel asked for help building communication between Notion databases and an Adalo app.
Package	USD 1,500 fixed; one approved sync direction first - Notion-Adalo Sync v1
Path	Make Community reply/DM to Emanuel_Arias

Fit

The Make Community post is a direct integration help request and should be handled through forum reply/DM.

Area	Support deliverable
1	Schema map for up to two Notion databases and two Adalo collections
2	Sync-direction decision note with create/update/delete behavior and conflict rules
3	Make scenario or equivalent integration plan for one approved direction
4	Upsert and dedupe rules with stable IDs and retry behavior
5	Error log for failed records, missing fields, API limits, and auth problems
6	Handoff doc with setup steps, tokens-to-create list, and acceptance checklist

Boundary

No live API tokens, user private data, payment data, or production records should be shared by forum DM or email.

USD 1,500 fixed; one approved sync direction first	Reply or DM in Make Community with the packet link; ask for sample schemas and one desired sync direction.
