

Typebot-Airtable-AI setup rescue

Prepared by Nakul as an independent freelancer/sole proprietor for Ann - Make, Typebot, OpenAI, and Airtable setup. This is a fixed rescue sprint using a sandbox bot, dummy Airtable rows, and approved keys only in a secure workspace. This does not include medical/legal/financial advice flows, deceptive bot behavior, scraping, or production support beyond the handoff.

Buyer	Ann - Make, Typebot, OpenAI, and Airtable setup
Opportunity	Ann asked for Make, Typebot, OpenAI, and Airtable setup help, including Typebot conditions and a 403/API permissions issue.
Package	USD 850 fixed; sandbox and dummy rows first - Typebot-Airtable-AI setup rescue
Path	Make Community reply/DM to Ann

Fit

The Make Community post is a direct small-budget build request and should be handled through forum reply/DM.

Area	Support deliverable
1	OpenAI/model access and 403-permission diagnosis checklist
2	One working multi-step Typebot flow with conditions and expected bot responses
3	Airtable read/write connection through Make using dummy rows and clear field mapping
4	Basic error visibility for failed API calls, missing fields, and bad model responses
5	Token/scope setup guide without exposing secrets in messages
6	Final acceptance checklist with one pass/fail test run

Boundary

No API keys, personal data, private customer records, or regulated advice content should be sent by forum DM or email.

USD 850 fixed; sandbox and dummy rows first	Reply or DM in Make Community with the packet link; ask for screenshots of the error and dummy Airtable fields.
