

Limited Parking Data Migration and Integration Acceptance QA Support

Prepared by Nakul as an independent freelancer/sole proprietor. This is a narrow support proposal for data migration QA, integration acceptance, reporting QA, UAT evidence, and go-live readiness around the cloud-based parking management system RFP. It is not the full cloud PMS, hardware, LPR, enforcement platform, legal compliance, cyber insurance package, or ongoing maintenance contract.

Buyer	Revenue Authority of Prince George's County
RFP	RVA-PMS-04-2026 Cloud-Based Parking Management System; electronic proposals due June 1, 2026
Package	USD 14,500 fixed parking data migration, integration acceptance, reporting QA, UAT, and go-live evidence support
Positioning	Support for the Revenue Authority, selected prime, or selected PMS vendor; not a full system or hardware bid

Fit

The support slice focuses on RFP risk areas that are data-heavy and evidence-heavy: migration reconciliation, LPR/payment/ERP/court/CRM/collections/DMV integration acceptance, payment and citation lifecycle edge cases, BI dashboards, revenue analysis, forecasting, spatial mapping, UAT scripts, training handoff, and launch readiness.

Area	Support deliverable
Migration reconciliation	Checklist for citation, payment, permit, account, collections, location, status, and owner mappings; duplicate/under/over-payment cases; and sample reconciliation evidence.
Integration acceptance	Matrix for LPR, payment, ERP/financial, court/Tyler, CRM/311, collections, DMV lookup, and reporting paths with expected behavior and retest status.
UAT and reporting QA	Test scenarios for citation lifecycle, permits, payments, refunds, reporting, dashboards, forecasting, spatial views, data dictionary gaps, and operational handoff.
Issue register	Severity, evidence, likely owner, remediation status, retest result, launch-risk note, and go-live readiness summary.
Data boundary	No live citation records, license plates, payment data, DMV records, credentials, or enforcement exports requested by email; use sample or anonymized records first.

Fixed price: USD 14,500	Next step: if this support slice can be considered, register it as a narrow proposal beside the primary PMS vendor or route it to the selected prime/vendor after award. The package avoids production data over email.
