

Limited Power BI QA/UAT, Data Validation, and Handoff Support

Prepared by Nakul as an independent freelancer/sole proprietor. This is a narrow support packet for the Bonfire procurement path or a selected implementation vendor: dashboard acceptance testing, data-validation evidence, defect/retest tracking, documentation, and training handoff. It is not a full implementation-prime bid, vendor-of-record insurance package, Court licensing proposal, or long-term managed-services contract.

Buyer	Superior Court of California, County of Placer
RFP	SP-2026-0010 Power BI Development Services; Bonfire close May 13, 2026 at 5:00 PM Pacific
Package	USD 18,500 fixed Power BI QA/UAT, data-validation, documentation, and handoff sidecar
Inputs	Dashboard inventory, approved definitions, sample/non-confidential extracts, staging workspace access after approval, and tracker format

RFP-Specific Fit

Public summaries describe roughly 20 existing Power BI dashboards, data consistency and reporting-efficiency goals, accessibility/readability improvements, and source consolidation from eCourt, Tyler jury, and other internal systems. This support slice focuses on the acceptance evidence that keeps dashboard modernization from becoming a subjective go-live decision.

Deliverables

Area	Support deliverable
Acceptance checklist	Representative checks for totals, measures, slicers, date ranges, drilldowns, tooltips, refresh timing, layout, accessibility, and export behavior.
UAT script pack	Role-based scripts with expected result, actual result, evidence, owner, status, and retest fields for each dashboard group.
Defect register	Severity, source, screenshot/evidence note, likely owner, status, retest result, and release-readiness impact.
Data dictionary review	Definitions, measure logic, source fields, transformation notes, owner assignments, and unresolved definition risks.
Handoff kit	Dashboard owner checklist, support queue rules, training quick reference, governance notes, and final readiness summary.

Boundaries

This should move through Bonfire or a selected-vendor/subcontract path, not casual email outreach. No case records, jury records, personnel data, credentials, or confidential Court files are requested by email. Production data extraction, Court licensing, insurance/vendor-of-record requirements, full implementation staffing, and long-term managed services are outside this fixed support package unless separately approved.

Fixed price: USD 18,500	Next step: use this as a portal-ready attachment or selected-vendor support packet, then confirm required Bonfire forms, insurance/vendor requirements, accepted subcontract structure, and whether sample dashboards can be reviewed without confidential records.
