

Migration QA, UAT Evidence, Reporting Readiness, and Stabilization Support

Prepared by Nakul as an independent freelancer/sole proprietor. This is a narrow support packet for the Missouri State Public Defender case-management modernization: legacy migration validation, requirements traceability, UAT scripts, defect retest, reporting readiness, cutover evidence, and stabilization handoff. It is not a full prime response, core platform offer, hosting commitment, security-certification claim, insurance representation, or legal/compliance certification.

Buyer	Missouri State Public Defender
RFP	MSPD 000000003SL; public summary says responses due June 30, 2026 at 5:00 PM Central through MissouriBUYS/MOVERS
Package	USD 28,500 fixed migration QA, UAT, reporting-readiness, cutover-evidence, and stabilization support slice
Inputs	Approved requirements, non-confidential mappings, sanitized samples, lower-environment evidence after approval, defect tracker, and reporting format

RFP-Specific Fit

Public summaries describe a statewide platform with case management, portals, document intelligence, analytics, integrations, workflow automation, HCL Notes/Domino migration, UAT, training, and stabilization. This slice strengthens the implementation evidence beside a compliant prime, without claiming to provide the core system, hosting, security certifications, court integrations, or statewide SaaS operations.

Deliverables

Area	Support deliverable
Migration QA workbook	Source inventory, target mapping, field risk notes, sample reconciliation, exception categories, owner/status columns, and cutover blockers.
Traceability matrix	Functional requirements mapped to build, migration, integration, reporting, test, training, evidence, and signoff status.
UAT script pack	Scripts for intake, case assignment, attorney/client portals, documents, events, financials, reports, permissions, and notifications.
Defect retest register	Severity, reproduction path, evidence, retest result, release risk, owner, and stabilization follow-up format.
Stabilization handoff	Readiness register, launch checklist, known issues, training notes, support rhythm, and post-launch reporting checks.

Boundaries

This should move through MissouriBUYS/MOVERS, a qualified prime, subcontract, or formally approved procurement path. It should not be sent as casual outreach. No privileged case data, client records, credentials, production exports, or confidential MSPD files are requested by email. Core platform delivery, hosting, SOC 2/ISO certification, CJIS/HIPAA legal certification, insurance representation, Missouri supplier compliance, and full prime obligations are outside this fixed support package unless separately verified.

Fixed price: USD 28,500	Next step: use this as a selected-prime/subcontract support packet or formally approved MOVERS response attachment, then confirm supplier registration, mandatory exhibits, insurance/security responsibilities, subcontract acceptance, and whether only sanitized or lower-environment evidence can be reviewed.
