

Limited ADA, Migration, Performance, and Launch-Readiness QA Support

Prepared by Nakul as an independent freelancer/sole proprietor. This is a narrow support proposal for acceptance testing, evidence, retest notes, and staff handoff around Baxter State Park’s published website design and hosting RFP. It is not a full design-prime proposal, hosting proposal, CMS license, legal accessibility certification, or long-term maintenance contract.

Buyer	Baxter State Park Authority
RFP	Design of a new website plus hosting and technical maintenance; electronic proposals due May 20, 2026
Package	USD 8,500 fixed launch QA, ADA-oriented checks, transition evidence, and staff handoff notes
Inputs	Public/current pages, approved staging access, proposed structure, representative ecommerce/forms/search paths, and preferred tracker format

RFP-Specific Fit

The support slice focuses on launch-risk areas named in the RFP: approximately 45 unique pages, ecommerce, search, semantic tags, ADA Title II web and mobile accessibility, mobile-first responsiveness, UI/UX acceptance, CMS handoff, transition support, performance testing, owner-rights handoff, and staff-ready maintenance evidence.

Deliverables

Area	Support deliverable
Acceptance checklist	RFP-aligned checklist for ADA, mobile, ecommerce, search, content transition, CMS handoff, analytics readiness, performance, and owner-rights acceptance.
Issue register	Severity, evidence note, reproduction detail, likely owner, remediation status, retest result, launch-readiness note, and open-risk summary.
ADA-oriented QA	Manual checks for headings, keyboard path, focus, labels, alt text, contrast, link purpose, forms, document samples, semantic structure, and mobile paths.
Migration and launch QA	Spot checks for priority pages, redirects, metadata, links, images, downloads, maps, news/posts, ecommerce paths, search, and high-use visitor flows.
Staff handoff	Concise publishing guardrails for accessible pages, images, links, forms, downloadable files, announcements, embedded media, and future content updates.

Boundaries

This supports BSP directly or the selected website/design/hosting vendor; it does not replace the full website provider. No visitor records, ecommerce exports, credentials, analytics exports, or private BSP files are requested by email. Hosting, CMS licensing, full custom development, legal accessibility certification, and ongoing technical maintenance are outside this fixed package unless separately scoped.

Fixed price: USD 8,500	Next step: register this sender for addenda if the limited support slice can be considered, then confirm whether BSP wants the acceptance checklist and issue-register format before vendor selection discussions.
