

Limited Routing Data Readiness and Acceptance QA Support

Prepared by Nakul as an independent freelancer/sole proprietor. This is a narrow support question for routing data readiness, acceptance testing, GPS validation samples, issue tracking, and cutover evidence. It is not a bus routing software bid, GPS/fleet platform bid, implementation-prime proposal, legal/privacy advice, or ongoing system maintenance contract.

Buyer	Harford County Public Schools
RFP	RFP 26-SR-014 Bus Routing, Fleet Management, GPS, and School Planning Solutions
Package	USD 9,500 fixed routing data readiness, acceptance QA, validation tracker, and cutover evidence support
Question	Can this limited support slice be considered directly, or should it be routed only through the selected routing/fleet/GPS vendor?

Fit

The support slice sits beside the core routing/fleet/GPS solution and focuses on acceptance evidence: route data quality, required-field ownership, GPS-to-route validation samples, exception scenarios, issue register discipline, training/cutover readiness, and executive-readable unresolved-risk notes.

Area	Support deliverable
Data readiness	Checklist for route, stop, vehicle, school, schedule, eligibility, and export/import fields; duplicate/missing/invalid-value checks; and ownership rules.
Acceptance tests	Scenarios for bell schedules, route exceptions, service changes, parent-facing outputs, reporting, and selected-vendor handoff criteria.
GPS validation	Sample plan for device-to-route matching, stale signals, vehicle identifiers, timing variance, and route-completion evidence.
Issue register	Severity, evidence, likely owner, remediation status, retest result, launch-risk note, and cutover readiness summary.
Privacy boundary	No student names, home addresses, live route assignments, GPS logs, credentials, or internal exports requested by email; use sample or anonymized data first.

Fixed price: USD 9,500	Next step: confirm whether HCPS can consider this limited support slice directly, or whether it should be routed only through the selected routing/fleet/GPS vendor and the RFP's formal submission path.
