

HubSpot document rescue sprint

Prepared by Nakul as an independent freelancer/sole proprietor for Ray Roberts / HubSpot document export. This is a compact migration rescue, not a broad CRM rebuild. This is not a Nutshell platform guarantee until attachment ingestion capabilities are confirmed.

Buyer	Ray Roberts / HubSpot document export
Opportunity	HubSpot document export or transfer to Nutshell with a clear one-time migration/debug need.
Package	USD 950 fixed for the 25-record sample proof; full run quoted after inventory - HubSpot document rescue sprint
Path	Forum/DM path only unless Ray provides an email. Verify Nutshell attachment support before promising transfer.

Fit

The ask is sharply bounded: documents are stuck in HubSpot and the buyer needs evidence for either transfer or reliable export.

Area	Support deliverable
1	HubSpot document and association inventory for a representative sample
2	Nutshell attachment/API feasibility check with fallback export route
3	25-record test transfer or export with success/failure evidence
4	CSV manifest with object ID, document name, owner, association, status, and error note
5	Failure taxonomy for permissions, duplicates, unsupported files, and missing associations
6	Full-run quote and runbook after sample proof

Boundary

No customer private documents should be sent by forum DM or email; use a least-privilege workspace, sample records, or redacted test files.

USD 950 fixed for the 25-record sample proof; full run quoted after inventory	Reply in Make Community/DM with the packet link and ask for a 10-record redacted sample or screen share of document associations.
