

Legacy scheduling data migration readiness pack

Prepared by Nakul as an independent freelancer/sole proprietor for Town of Parker / PACE. This is a specialist support package beside a future or primary scheduling platform vendor, or as a portal attachment if the path is approved. This is not the scheduling platform, payment processor, hosting contract, legal retention advice, or full prime SaaS proposal.

Buyer	Town of Parker / PACE
Opportunity	PACE event and building scheduling system replacement with migration and integrations scoring weight.
Package	Indicative fixed-price support slice: USD 9,500, subject to portal eligibility and final scope; not a standalone prime SaaS proposal - Legacy scheduling data migration readiness pack
Path	Portal-only. Do not send casual email or submit without action-time approval.

Fit

The RFP centers on a scheduling platform procurement; this packet is only a data-migration support slice if the portal or subcontract path is allowed.

Area	Support deliverable
1	Legacy scheduling source inventory and export checklist
2	Field mapping matrix for events, rooms, staff, customers, fees, and integrations
3	Duplicate, missing-value, inactive-record, and attachment exception rules
4	Test migration checklist with sample-load acceptance criteria
5	Defect and retest register for vendor/user review
6	Cutover evidence pack with rollback notes and post-launch checks

Boundary

No patron, payment, staff, or facility booking records should be sent by email. Use synthetic data, redacted samples, or schema-only field lists in an approved workspace.

Indicative fixed-price support slice: USD 9,500, subject to portal eligibility and final scope; not a standalone prime SaaS proposal

Use as a Bonfire/portal-ready support attachment only after confirming the submission path, forms, and eligibility.
