

M365 and SharePoint information governance pilot

Prepared by Nakul as an independent freelancer/sole proprietor for City of Raleigh Planning & Development. This is a support slice beside a records-management lead or formal portal response if the path is approved. This is not legal records-retention advice, a citywide records-management prime bid, or a Microsoft licensing package.

Buyer	City of Raleigh Planning & Development
Opportunity	Records and information governance consulting across selected pilot content categories and records lifecycle workflows.
Package	Indicative fixed-price pilot support slice: USD 18,000, subject to portal eligibility and buyer approval - M365 and SharePoint information governance pilot
Path	Portal-only. Do not send or submit without action-time approval.

Fit

The solicitation is broader than tooling, but the pilot lane maps well to SharePoint/M365 governance and repeatable workflow evidence.

Area	Support deliverable
1	Pilot content inventory template for selected content categories and record families
2	Taxonomy and metadata draft with owners, retention prompts, and exception rules
3	SharePoint/M365 permissions review checklist for pilot libraries and groups
4	Workflow QA checklist for intake, classification, access, retention trigger, and handoff
5	Issue/risk register covering privacy, access, duplicate stores, and unsupported content
6	Pilot findings memo with rollout backlog and governance decision points

Boundary

No confidential records content should be sent by email; use metadata inventories, redacted samples, or approved workspace exports.

Indicative fixed-price pilot support slice: USD 18,000, subject to portal eligibility and buyer approval	Use as an NC eVP portal-ready support packet after checking forms, supplier requirements, and submission eligibility.
