

Safety dashboard prototype + update workflow support

Prepared by Nakul as an independent freelancer/sole proprietor for MORPC - Central Ohio Transportation Safety and Non-Motorized Data Collection Plans. This is an indicative specialist support slice for a prime/subconsultant attachment or formal compliant proposal path after approval. This is not licensed traffic engineering, legal safety certification, or a full planning-prime proposal.

Buyer	MORPC - Central Ohio Transportation Safety and Non-Motorized Data Collection Plans
Opportunity	Transportation safety and non-motorized data collection plans with regional safety dashboard, GIS, and update workflow needs.
Package	Indicative fixed-fee support slice: USD 12,500, subject to MORPC/prime approval and final contracting - Safety dashboard prototype + update workflow support
Path	Use only as prime/subconsultant collateral or formal compliant proposal path after approval; do not send as a casual inquiry.

Fit

The overall RFP is a large consultant scope, but a data workflow prototype is a practical support lane for a prime or internal project team.

Area	Support deliverable
1	Safety KPI and data-source model for crash, VRU, bike/ped counts, and plan priorities
2	Dashboard wireframes for executive view, corridor/location view, and update status
3	Data dictionary with field definitions, source owner, refresh cadence, and quality checks
4	Sample update workflow for monthly/quarterly data refresh and issue review
5	QA checklist for missing values, stale records, duplicate locations, and map joins
6	Handoff memo for the prime team with open decisions and implementation backlog

Boundary

No confidential or restricted datasets should be sent by email; use public/sample datasets or an approved secure workspace.

Indicative fixed-fee support slice: USD 12,500, subject to MORPC/prime approval and final contracting	Use only as a prime/subconsultant attachment, or as a formal compliant proposal path after action-time approval.
