

Limited Multilingual, Accessibility, Migration, and Launch-Readiness QA Support

Prepared by Nakul as an independent freelancer/sole proprietor for Hiawatha Academies. This is a narrow support proposal for acceptance testing, evidence, retest notes, and staff publishing guardrails around the published website modernization RFQ. It is not a full redesign-prime proposal, hosting proposal, CMS license, legal accessibility certification, or long-term maintenance contract.

Buyer	Hiawatha Academies
RFQ	Modernization and Redesign of School Website; proposal deadline May 15, 2026 at 11:59 PM
Package	USD 12,000 fixed multilingual/accessibility/content-migration QA sidecar
Inputs	Representative URLs/templates, staging access after approval, sample language paths, and preferred tracker format

RFQ-Specific Fit

The support slice focuses on launch-risk areas named in the RFQ: family-facing recruitment and communication journeys, WCAG 2.1 A/AA-oriented accessibility, English-Spanish-Somali coverage, content migration continuity, mobile responsiveness, search/forms, analytics, and staff publishing handoff.

Deliverables

Area	Support deliverable
Acceptance checklist	RFQ-aligned checklist for mobile, accessibility, multilingual navigation, migration, forms, search, analytics, and CMS handoff.
Issue register	Severity, evidence note, reproduction detail, likely owner, remediation status, retest result, and launch-readiness note.
Language and accessibility QA	English, Spanish, and Somali coverage review plus WCAG-oriented checks for headings, keyboard path, labels, alt text, contrast, documents, and forms.
Migration and launch QA	Spot checks for priority content, redirects, titles, metadata, documents, images, broken links, high-use family pages, analytics, and search.
Staff handoff	Concise publishing guardrails for accessible pages, links, alt text, PDFs, announcements, embedded media, and translated content updates.

Boundaries

This supports Hiawatha directly or the selected website/CMS vendor; it does not replace the full website provider. No student records, family records, credentials, payment data, analytics exports, or private Hiawatha files are requested by email. Hosting, CMS licensing, full custom development, legal accessibility certification, and long-term maintenance are outside this fixed package unless separately scoped.

Fixed price: USD 12,000	Next step: register this sender for addenda if the limited support slice can be considered, then confirm whether Hiawatha wants the acceptance checklist and issue-register format before vendor selection discussions.
